

Professional Italian Integration experiences good opportunities with Nuklospray Yoghurt.

A trial at a sow farm in Italy. The company has done a test with Nuklospray Yoghurt, under supervision of Sloten Italy.

Conclusion

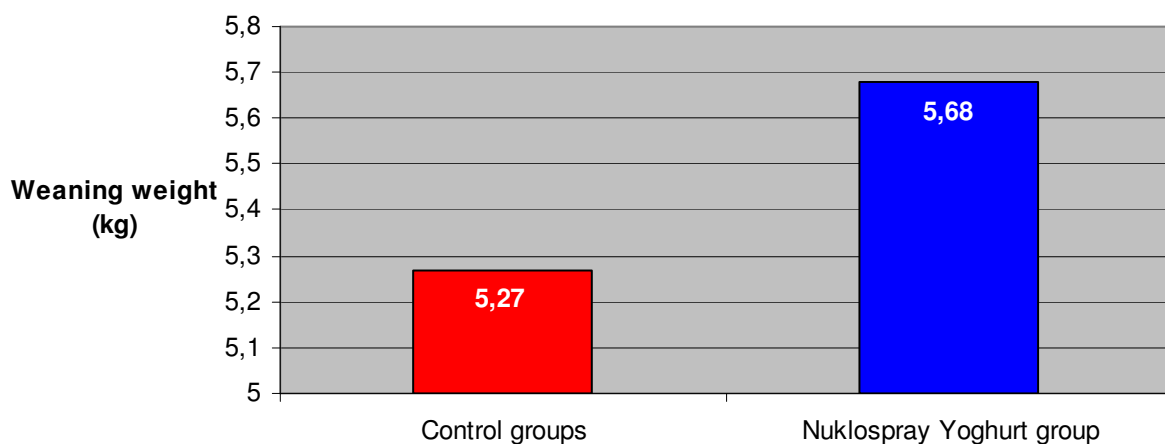

Nuklospray Yoghurt has a positive effect on the weaning weight of piglets at the experimental farm. The weaning weights of the piglets in the Yoghurt group are on average 410 gram higher than the Control group.

Trial

The experimental test is done, to determine the effect of Nuklospray Yoghurt on piglets. Therefore the weaning weights of the test with Yoghurt are compared with the weaning weights of two control data.

Results

Best results are achieved in the moderate litters and litters where the sow had a low milk production. The gathered results below, shows a 410 gram higher weaning weight, caused by the Nuklospray Yoghurt.

Weaning weight on average + 410 gram
